

SolarNet | Providing solutions for tomorrow's problems

IT Consultancy Services

With over 15 years experience in providing IT consulting services across a multitude of industries

SolarNet can help your business assess different technology strategies and align them to your own technology, business or process strategies to ensure your business is maximising the benefits of it's investment in IT.

The consultancy service we offer draws on our own knowledge and expertise of the IT industry so that we can supply expert advice and guidance to support you throughout the life-cycle of your IT deliveries.

We strive to ensure that all consultancy engagements have clear, well-defined scope and deliverables resulting in you receiving the best outcome at a cost and duration which meets your needs

Here's how we can help you

We can offer expertise in the following areas that can be tailored to your needs:

- Migrations to Cloud Solutions
