

SolarNet | Providing solutions for tomorrow's problems

SOAR Consultancy Services

So, you have a SOAR platform or your looking to purchase one, it seems like the best way to improve your company's overall efficiency when it comes to identifying and responding to cyber threats. You may already have a SIEM in place to aid with the gathering of the intel required to make those key decisions when it comes to mitigation or remediation of a cyber threat, however there's a snag.

How do you turn the SOAR solution of choice into the all signing all dancing cyber security capability that you were promised or indeed witnessed during the sales demonstrations and proof of concept workshops?

At SolarNet we pride ourselves on offering the most reliable and flexible SOAR consultancy services on the market.

We are one of the few specialist companies that truly understand SOAR and its application within all business models

Here's how we can help you

SolarNet can help you unlock the potential in your SOAR platform so it provides you with all those key benefits promised by the sales team in a much shorter timeframe than going it alone.

We have developed numerous integrations, workflows, playbooks and reports to help companies get the most from their platform, here's a sample of some key areas we can assist you with:

- Business Process Translation/Transformation into SOAR Frameworks
- Platform Deployment
- Platform Technology Advise
- Platform Integrations; Inception and Development; (covering but not limited to):
- Bespoke Tools / Custom Integrations
- AIR - Automated Incident Response
- Azure AD
- Emails
- Threat Protection
- Security and Compliance Center
- Workbook / Playbook Inception and Development

Some of our integrations (we have 200+)
