

SolarNet | Providing solutions for tomorrow's problems

Test & Automation Services

SolarNet offers a comprehensive test and automation service, tailored to a multitude of industries from Telecommunications to core IT and content management systems, and many more.

SolarNet has a long and varied experience within the software development, automation, testing, Telecoms, Cyber Security and IT industries.

We have also established partnerships with all kinds of organisations from technology providers through to those offering IT introductory services. These partnerships have enabled us to broaden our service offerings with technology that compliments our own capabilities. By working closely with our partners we are able to deliver the very best service, to the highest possible standards, which our customers have come to expect from us.

We offer a complete service package to suit you no matter your preferred framework or methodology.

Here's how we can help you

Do you have a technology stack that is difficult to manage, or processes that tie your employees up in knots making it difficult to get things done?

Our team of experienced professionals can help analyse your workflows and business processes to identify where automation can help your business no matter what technology or process is in use we are confident we can enable your business to gain:

- Growth beyond projected forecasts
- Greater staff retention
- Increased profit margins
- Significant operational efficiencies
- Stronger market presence vs the competition

We have a vast experience in using the following as part of the testing life-cycle:

- HP ALM
- JUnit
- Load Runner
- QA Wizard
- Sahi
- Selenium & Selenium RC

Whether it's testing of an IT application or content management system, network infrastructure or even a full blown network deployment with service overlay included from requirements through to delivery then you've come to the right place
