PER YEAR

Premium Security at an Affordable Price

In the modern digital workplace, applications and systems are accessible from any device whether they are hosted in the cloud or on premise. It's now even more important to ensure your organisation has the best possible security posture to protect you from the cyber threats of today and tomorrow.

Security Assessments

At SolarNet our team have 50+ years combined experience in cyber security enabling us to perform Security Assessments with ease. This assessment gives you an up to date view of your organisation's security position, identifies critical security issues and how to fix them. Don't worry if remediation of security issues is not your strong suit SolarNet are here to provide guidance and support with anything that you may need.

We offer a straight forward approach to Microsoft 365 security assessments underpinned by our knowledge and expertise in this sector.

What are the benefits of having a Security Assessment?

- Fast Assessment with Zero Impact to Users
- Your Microsoft 365 Data is Protected
- Cutting-Edge Innovate AI Based Assessments
- Helps Secure your IT from External Threats
- Quickly Identifies Vulnerabilities and Risks from External Threats
- Understand your Cyber Threat Landscape
- Real-world Threat Intelligence
- Post Assessment Support

Drive efficiency and improve security with predictive, actionable insights into your external attack surface and your third parties.

ISO Certified

SolarNet are certified **ISO 27001 - Information Security Management** and **ISO 9001 - Quality Management** compliant, which epitomise our ability to consistently meet our customer's expectations and regulatory requirements.

Penetration Testing

Does your organisation have a digital presence either internally or internet-facing to perform business critical functions? If so then understanding your organisation's internal and external attack surface is paramount in minimising your exposure to cyber threats that can lead to breaches for you and your third party supply chain.

At SolarNet our vast cyber security experience and trusted partner network enables us to provide state-of-the-art accredited penetration testing of wired and wireless networks, applications and online platforms using the same tactics, techniques and procedures that cyber criminals use to gain access to your network and your data.

Undertaking a penetration test provides you with a comprehensive report that identifies what live vulnerabilities you have, a risk score of how likely they are to be exploited, who is likely to exploit them and how they are going to do it. But most importantly it provides the remediation steps enabling you to take the necessary measures to stop your cyber risks before they happen.

What are the benefits of performing Penetration Testing?

- Gain Important Business Insights into Cyber Security
- Identify & Prioritise Real-Time Risks
- Helps Secure your IT from External Threats
- Quickly Identifies Vulnerabilities and Risks from Cyber Threats
- Obtain and Maintain Compliance
- Test Cyber Security Incident Response Plans
