

SolarNet

Why switch to Smart SOAR?

The partnership that will transform how your security team works, by focusing its resources on real threats

With a growing emphasis on protecting a company's critical data and information assets, overcoming alert fatigue and being able to identifying real threats rapidly has never been more important. SolarNet's expertise in this sector make them the ideal integration specialist and consultancy service providers of D3 Security's Smart SOAR. We help clients around the world harness the power of their entire security infrastructure to rapidly identify, analyse, and resolve advanced threats.

SolarNet

We are one of the few specialist companies that truly understand SOAR and its application within all business models.

In partnership with D3 Security, SolarNet can help you unlock the potential in your SOAR platform and get it providing you with an array of key benefits. We've been working with SOAR platforms for a while now and know how tricky it can be to get to grips with.

Over the years we have developed numerous integrations, workflows, playbooks and reports to help companies get the most from their platform, here's a sample of some key areas we can assist you with:

- Business Process Translation/Transformation into SOAR Frameworks
- Platform Deployment
- Platform Technology Advice
- Platform Integrations; Inception & Development; (covering 200+ systems but not limited to):

Anomali ThreatStream, Bespoke Tools / Custom Integrations, Bricata, FireEye HX, Microsoft Graph, Qualys, QRadar / QROC, ServiceNow

- Workbook / Playbook Inception & Development

We have a unique ability to solve problems – it's in our DNA – and combined with our extensive knowledge of the D3 Smart SOAR platform we can help advise, implement and manage your SOAR journey. Whether you are new to SOAR or an existing SOAR user, SolarNet are here to help you. Let our expertise and guidance navigate you on our journey with SOAR.

SolarNet are certified ISO 27001 - Information Security Management and ISO 9001 - Quality Management compliant, which epitomise our ability to consistently meet our customer's expectations and regulatory requirements.

D3 Security

Expert-Built and Maintained Integrations

We take the responsibility for building, testing, and updating integrations entirely off your hands.

Three Tiers of Automation

What makes Smart SOAR smart? One key difference is our distinct tiers of automation. Event-level automation performs triage and enrichment, only escalating genuine threats. Incident-level automation orchestrates actions across the environment. Finally, scheduled automation enables workflows like threat hunting and vulnerability management.

Ingest Alerts + Telemetry

Effortlessly ingest data from your entire environment via professionally built and maintained, feature-rich integrations.

Stop Missing Threats

One standardised queue for all security alerts.

Normalise, Contextualise + Triage

Normalise your alert data for powerful cross-stack correlation of IOCs, TTPs, identity, and more. Automatically triage based on comprehensive analysis.

Stop False Positive Waste

Filter out 90% of incoming alerts, so you can focus on real threats.

High-fidelity Threats for Investigation

Spend more time on real threats, armed with complete context and enrichment. Orchestrate across the stack to instantly shut down threats.

Stop Responder Burnout

Eliminate repetitive tasks, reduce alert volume, and keep your team happy.
