# DATA BREACH

**We secure  
your cyber  
resilient future**

Threat detection,  
investigation  
& response  
platform

**ODYSSEY™**  
cybersecurity

**Along with the countless opportunities the era of digital transformation and AI present, comes a fast evolving and expanding threat landscape. Threat actors move at a faster pace than organisations can react, creating a global concern over the breadth and depth of destruction cyber-attacks can cause. SolarNet's knowledge and expertise in this sector make them the ideal licensed technology partners, resellers and managed services providers of Odyssey ClearSkies with their 360° holistic approach for achieving cyber resilience.**

## SolarNet

SolarNet are a predominantly services-focused company with a global partner network of technologies enabling businesses to identify threats, be prepared, understand their security position and stop them from becoming a reality.

We are a licensed technology partner, reseller and managed services provider of Odyssey ClearSkies™ solutions helping organisations to unlock the intelligence of their log and event data through the combined SIEM and SOAR technology. With our 50+ years combined experience in cyber security and by utilising the Odyssey ClearSkies™ platform discovering patterns of suspicious/malicious behaviour hidden inside your network activity couldn't be easier.

We can help you extend your own detection & response capabilities into an ecosystem that intelligently transforms log and event data into actionable security intelligence, enabling the rapid detection and response to sophisticated threats and vulnerabilities.

### What benefits do SolarNet provide with the Odyssey ClearSkies platform?

- Automate and orchestrate responses to security incidents based on event log data and correlations
- Behaviour Analysis (Event log information analysis to detect suspicious/malicious behaviour and intrusions)
- Centralised Event Management (Monitoring, classification and management of events according to their severity)

SolarNet are certified **ISO 27001 - Information Security Management** and **ISO 9001 - Quality Management** compliant, which epitomise our ability to consistently meet our customer's expectations and regulatory requirements.

- Compliance (Monitoring compliance status through dashboards and reports to gain a broad compliance overview)
- Performance & Availability (Proactive monitoring of the performance and availability of network devices)
- Real-Time Analysis (Development of complex search queries for analysing large volumes of data/threats with intelligent parameters)
- Threat Intelligence (A continuously updated, analysed & contextualised feed of evidence-based knowledge of emerging cyber-threats and vulnerabilities)

Our knowledge and expertise extend to a variety of industries across both private and public sectors. We also offer a range of products and services specifically tailored for the Education sector.

## Odyssey ClearSkies™

ClearSkies™ TDIR platform takes a risk-based approach to help organisations minimise Attackers' Dwell-Time, simplify the investigation process, prioritise response actions and thus optimising SOC operations.

The platform centralises the analysis of alerts generated from disparate technologies to help you streamline your incident management and response, identify weak technology implementation and maximise the efficiency of scarce security personnel.

By utilising machine-learning and artificial intelligence in innovative ways, the ClearSkies™ TDIR platform accelerates the rate at which you anticipate, detect, investigate and respond to sophisticated cyber, insider and third-party threats.
