

SolarNet

**You don't
need more
tools, you need
better tools**

**See, secure & defend
in one unified
platform**

Rebas@ft

Traditional asset management was built for ITIL, not for security. Scans and agents don't account for everything, leaving gaps in visibility. And data is often misaligned between a dozen programs, resulting in frustrating guesswork.

SolarNet are valued partners, resellers and managed services providers of Rebasoft who have created an IT Asset Management and IT Compliance platform offering a range of functionality which reduces 'tool sprawl', consolidates security configurations, uses machine learning to match vulnerabilities to assets with 99.9% accuracy all without requiring the use of agents or network scanning activities.

SolarNet

SolarNet are a predominantly services-focussed company with a global partner network of technologies enabling IT asset management with a focus on security-based configurations. Native integration to asset management means better coverage and better security. Tracking vulnerabilities on a per-device basis couldn't be simpler, meaning you filter out the noise and reduce workflows.

We are a licensed technology partner, reseller and managed services provider of Rebasoft's platform helping organisations discover all their assets on their network without the use of agents, leaving no stone unturned.

With 50+ years combined experience in cyber security and by utilising the Rebasoft platform we can perform security configuration checks of all your IT assets for compliance to security frameworks such as Cyber Essentials. Delivering defence in depth covering switches, firewalls and anything in between.

What benefits do SolarNet provide with Rebasoft's IT asset and vulnerability management platform?

- Additional Cost Savings (Better value than point solutions and can even replace some)
- Agentless (Simpler, easier, lower workload and more accurate)
- Behaviour Analysis (can be analysed using information associated to network traffic, NetFlow)
- Integrated (There's no jumping between tools, everything is seamlessly integrated, so it's simpler, easier and more effective)

SolarNet are certified **ISO 27001 - Information Security Management** and **ISO 9001 - Quality Management** compliant, which epitomise our ability to consistently meet our customer's expectations and regulatory requirements.

- Native Discovery (We don't aggregate data, we provide it fresh, we are your single source of truth)
- No Scans (Less gaps, better visibility, better security)
- Evergreen Vulnerability Management ('Always-On' means it's more accurate, proactive, and you can reduce false positives because we track by asset)

Our knowledge and expertise extend to a variety of industries across both private and public sectors. We also offer a range of products and services specifically tailored for the Education sector.

Rebasoft

Businesses face rising costs and staff shortages – yet the threat landscape is increasing. So you need more tools to deal with new threats but you have less staff and money. The fact is, current cybersecurity tools simply don't allow you to protect yourself anymore.

Rebasoft provides unparalleled, real-time visibility into your IT estate through our unique network based monitoring. You can see every digital IT asset, their configurations and their vulnerabilities.

See. Asset discovery & inventory; Criticality & prioritisation; Device details

Secure. Secure configuration; Network perimeter security; Malware coverage

Defend. Vulnerability management; Network access control; Behaviour monitoring

Three core solutions, one unified platform.
