

SolarNet

**Build
powerful
solutions. Fast.**

Automate your business
processes without
lengthy or complex
development

Automation and more recently Hyper-Automation have become industry buzzwords that marketers are attaching to their products to make them appear more relevant.

SolarNet are valued partners, resellers and consultancy service providers of Toca.io who have created a truly unique workflow automation platform.

SolarNet

SolarNet are a predominantly services-focussed company with a global partner network of technology providers. We enable businesses to identify inefficiencies in manual processes, streamline the mundane and get prepared for true workplace automation.

We are a licensed technology partner, reseller and managed services provider of Toca's workflow automation platform. Our experienced solution engineering team have extensive knowledge of maximising the return on investment of IT systems by combining capabilities through automation.

SolarNet has in-depth knowledge of the Toca platform that enables us to rapidly build enterprise-ready apps, from simple web portals to complex, logic-based applications with ease, making your ideas become a reality. We are well versed in the use of direct API integrations having built over 200 to various systems and IT platforms in our time as well as utilising RPA capabilities where an API isn't available.

Key benefits of using SolarNet's automation engineering service:

- Overcome complex development challenges with apps, automation and obtain extensible integrations
- Code natively to extend the platform, removing potential roadblocks associated with other low-code solutions
- An end-to-end platform woven into an organisation has the power to transform systems, people and processes
- Design, develop and deploy in a single platform, reducing cost and time from project inception to live production

SolarNet are certified **ISO 27001 - Information Security Management** and **ISO 9001 - Quality Management** compliant, which epitomise our ability to consistently meet our customer's expectations and regulatory requirements.

- SolarNet are adding 200+ pre-built security tool connectors making it a truly security-aware platform
- Automating your IT processes could potentially save you thousands - both in manpower hours and business costs

Our knowledge and expertise extend to a variety of industries across both private and public sectors. We also offer a range of products and services specifically tailored for the Education sector.

toca.io

Toca is a single platform to meet all of your digital transformation and automation needs. The lightning-fast Low Code environment allows you to both rapidly build bespoke applications and to place modern, more usable veneers on top of old systems.

Key features:

- Rapidly build enterprise-ready automations that combine the use of RPA bots, direct API integrations and data analytics, without a single line of code
- Reduce cost for development and lifecycle cost
- Reduce the risk of transformation by not having to rip out existing infrastructure
- Breathe new life into outdated systems with modern, user-friendly interfaces
- Reduce costs to serve and reimagine customer experiences all within one platform
- Toca is freely extensible. Extend and publish components on the fly, using C#, Python & React
- Enterprise security and reliability, built into the core
